FOREWORD

The "USAF Statistical Digest" (Short Title USAF SD-56) summarizes in one document the volume of statistical data collected and published by various offices in Headquarters, United States Air Force and certain major commands. It is published in accordance with AFR 5-24 and is to be used as the official basic reference document for the period and areas covered.

The Fiscal Year 1956 edition is the eleventh edition of the series. Original editions - Army Air Force Statistical Digest (World War II) and supplement Number 1, 1945 were followed by AAF Statistical Digest, 1946 and USAF Statistical Digest 1947. The 1946 and 1947 editions made Air Force statistics available in summarized form, available as far back as possible, with the exception of Combat Operations. This data is found only in the 1945 edition. The 1948 issue was the first strictly annual publication. Since 1949 each annual edition has been organized on a Fiscal Year basis.

Immediately following the Table of Contents is a Major Air Command Directory, containing information which is appropriate to all data included in this issue. Definitions appropriate to only one area will be found in an introductory statement preceding the Part in question. Tables indicated in the headnote as "New Tables" are tables which were not included in the FY 55 edition of this publication.

Sources of the majority of the data are the published and unpublished records of the Directorate of Statistical Services. The balance of the data was furnished by other agencies as noted in source reference data.

Correspondence relative to the content of this document as well as recommendation for new material for inclusion should be addressed to the Director of Statistical Services, Headquarters United States Air Force, Washington 25, D.C.

AIR FORCE UNITS AND CAPABILITIES

The tables included in this section provide a summary of all USAF Units and Summary data reflecting the status and deployment of USAF Combat and Troop Carrier Wings, and Flying Support Units.

Tables reflecting status and deployment contain the following data:

- a. Total units activated, Fiscal Years 1950 1956, inclusive.
- b. Equipped units by type and model of aircraft possessed, Fiscal Years 1942 1956, inclusive.
- c. Authorized, possessed, combat ready aircraft, and authorized, assigned, combat ready crews in units by type and model of aircraft, Fiscal Years 1950 1956, inclusive.
 - . . d. Operational Readiness of Combat and Troop Carrier Wings, Fiscal Year 1956.

DEFINITIONS

.....<u>Wing</u> - An air unit composed normally of one primary mission group and the necessary supporting organization, i. e. supply, maintenance, hospital and other services required by the primary mission group.

NOTE: In some cases, Combat and Troop Carrier groups do not have a parent wing. Also, certain Combat and Troop Carrier squadrons do not have a parent wing or group. Such units are shown in wing equivalents on the basis that one primary mission group or approximately three primary mission squadrons are the equivalent of a wing.

Combat Wing - A wing designed for direct participation in operations against enemy forces.

Troop Carrier Wing - A wing which has a mission of providing airlift for combat elements.

Flying Support Unit - A flying unit which has a mission of furnishing operational assistance to combat elements.

Operational Readiness - A measurement of relative capability. It is the degree to which a unit is manned, equipped and trained for the satisfactory performance of its primary

<u>Primary Mission</u> - The principal mission currently assigned the unit. Normally it is preparing for, or executing the task for which the unit was basically intended.

TABLE 3 -USAF COMBAT AND TROOP CARRIER WINGS AND SQUADRONS, WORLD-WIDE, CONTINENTAL US AND OVERSEAS, BY TYPE-FISCAL YEAR 1956

The following tables reflect the number of wings and/or groups (including Flying Support Units) and, in parentheses, the number of squadrons comprising the wings and/or groups. Combat and Troop Carrier Squadrons not having wing or group assignments are shown in wing equivalents on the basis of approximately three squadrons to a wing.

Statistics presented include only those Combat and Troop Carrier units (including Flying Support Units) activated or organized and for which inactivation or discontinuance had not been accomplished on the date shown.

Units located within the continental limits of the United States are shown within their respective command of assignment. Units located outside the continental limits of the United States are shown under the major commands in which they are located.

The Flying Support Units for FY 1956 are Troop Carrier Assault, Air Refueling, Air Transport, Air Rescue, Weather Recommaissance, Photographic Mapping, Airborne Early Warning and Control, Air Resupply, Logistic Support, Strategic Support, Radar Evaluation, Tow Target and Pilotless Bomber Light (redesignated to Tactical Missile).

TABLE 9 -OPERATIONAL READINESS OF COMBAT AND TROOP CARRIER WINGS - FISCAL YEAR 1956

Unit capabilities are expressed as "C" ratings. These evaluations are prepared by Headquarters USAF after considering all known factors affecting unit readiness.

C-1 High degree of relative effectiveness. Adequately manned, equipped and trained to perform primary mission with latest type UE(first line aircraft and equipment).

C-2 Same as C-1 except with second line aircraft and equipment (B-26, F-80, etc.) or with first line aircraft and equipment not designed to perform the primary mission of the unit.

C-3 A lesser degree of effectiveness than indicated above with either first or second line equipment. Shortage of personnel, equipment and facilities, etc, exists.

C-4 A very low degree of effectiveness. Extreme shortage in equipment, personnel and facilities exists.

FLIGHT OPERATIONS

INTRODUCTION AND DEFINITIONS

Aircraft flight operations data included in this section are based on statistics submitted on AF Form 110A in accordance with AFR 65-110 as revised. The 110A report is compiled on a physical possession basis with the various activity categories determined by the assignment or status of the aircraft rather than actual use.

As of 1 January 1956, the former "Active" aircraft category was expanded to "Operating Active" and "Non-Operating Active". The "Non-Operating Active" category includes status codes that were formerly inactive. In addition, (CX) MDAP Aircraft Temporarily Diverted to USAF was changed from "Active" to "Non-Operating Active" and (PA) Aircraft on Project was eliminated.

The tables provide summary data covering flight operations on "Operating Active" and "Non-Operating Active" USAF aircraft and include aircraft flying hours, utilization, etc.

Operating Active - Those aircraft which are actively engaged in supporting flying missions, including test aircraft and aircraft bailed to civilian activities for test. Assignment codes are as follows:

- (AD) Administrative: Aircraft authorized major air commands for the performance of command administrative missions.
- (CS) Operational Support: Aircraft assigned for easential liaison and logistic support not otherwise provided, and for the required combat readiness training of rated personnel not presently assigned to tactical units or crew positions.
- (CC) Primary Tactical Unit: Aircraft assigned as primary unit equipment for the direct accomplishment of tactical unit operations.
 - (CP) Tactical Unit Support: Aircraft which are authorized and assigned as tactical unit support aircraft.
- (CU) Student Training: Aircraft assigned to perform the mission of student and combat crew training within the Air Training Command only.
 - (CT) MATS Transport: Aircraft assigned for the accomplishment of transport operations within MATS.
 - (CE) MATS Air Evacuation: Aircraft assigned for the accomplishment of air evacuation operations within MATS.
 - (TC) Combat Crew Training: Aircraft assigned specifically to combat training schools.
 - (EX) Test: Aircraft assigned for testing, research and development other than "X" models and aircraft on bailment contract.
 - (ES) Test Support: Aircraft assigned to support of test aircraft and allied equipment other than aircraft on bailment contract for test support.
 - (CM) Special Mission: Aircraft assigned to major air commands to accomplish missions of the Air Force in support of its own special activities and those of the governmental agencies which cannot be met as a by-product mission of other flying.
 - (CX) MDAP Aircraft Temporarily Diverted to USAF: Aircraft programmed for foreign countries under the Mutual Defense Assistance Program for which delivery to the ultimate recipient foreign country has been deferred in order to divert temporarily these aircraft to the USAF.

Mon-Operating Active - Those aircraft in preparation for possession by units or test activities through any of the logistical processes of supply, maintenance, and modification, and those aircraft which are excess to command requirements.

Command Support: Includes aircraft in (DP) Depot Prototyping, (DW) Depot Work, (RT) Transient Maintenance, (XJ) Excess to Commands, (RA) USAF Aircraft Temporarily Possessed by ANG or AFRes, (RG) ANG Aircraft Temporarily Possessed by UEAF or AFR, and (NP) New Production.

(NR) Enroute: Aircraft in an en-route status.

GROUND SAFETY

DEFINITIONS

The tables included in this section are USAF Ground Accident statistics approved and directed by the Air Force Regulation 32-1, dated 24 August 1948. In establishing the reporting system, standardized cost factors and definitions have been approved. The present standard accident costs for injuries and fatalities were established by the Air Force Regulation 32-2, dated 12 April 1956.

ACCIDENT, GROUND

Any accident which occurs on or off an Air Force installation, base, or site which involves Air Force military personnel, Air Force civilian personnel on duty, or Air Force property. Reference paragraph 3, Air Force Regulation 32-2, dated 18 April: 1996.

ACCIDENT, PRIVATE MOTOR VEHICLE

A motor vehicle accident involving only non-Air Force motor vehicle or, if both Air Force and non-Air Force motor vehicles were involved, the Air Force motor vehicle was not being operated at the time of the accident. Motor vehicles which are not Air Force property will be considered as private motor vehicles. Vehicles which are the property of Government agencies other than the Air Force will also be considered as private motor vehicles.

ACCIDENT, USAF MOTOR VEHICLE

An accident involving the operating of an Air Force motor vehicle which results in either disabling or non-disabling injury to Air Force personnel and/or non-USAF persons and/or damage aggregating \$25.00 or more to Air Force motor vehicles, or to other vehicles or property without regard to ownership.

ACCIDENT, USAF PROPERTY

An incident resulting from Air Force ground operation wherein Air Force property is accidently damaged in amount of \$25.00 or more.

COMMAND (FISCAL YEAR MAJOR), CONTINENTAL US

COntinental Command - A Major Air Command whose headquarters and subordinate units are located within the Continental United States.

COMMAND (FISCAL YEAR MAJOR), OVERSEAS

Overseas Command - A Major Air Command whose headquarters and subordinate units are located outside the Continental United States.

DAYS OUT OF SERVICE

Air Force vehicle "days out of Service" and Air Force aircraft "days out of service" will be estimated total number of calendar days that the particular piece of equipment is out of service as a result of a ground accident, beginning with the day after the accident occurs and continuing up to the day on which it is estimated that the equipment will return to service.

GROUND SAFETY (CONTINUED)

DEFINITIONS

INJURY DISABLING

An injury which results in death, permanent total, permanent partial injury, or temporary total injury which in the opinion of competent medical authority makes it impossible for the injured to return to work or duty at any time during the next calendar day following date of injury.

INJURY, NON-DISABLING

A non-disabling injury is an injury which, although requiring medical attention, would not keep the injured person from performing his regularly assigned duties during the next calendar, day or any subsequent day. This type is generally known as a first-aid case.

PERSONNEL, CIVILIAN
Includes citizens and/or residents of the United States, its territories, and Canada, who are employed by the US Air Force and are paid from appropriated funds. Excludes Foreign Nationals.

PERSONNEL, MILITARY

Comprises officers and airmen serving on extended active duty with the Air Force, Members of other United States military services serving on extended active duty with Air Force units are included as Air Force Military Personnel.

Frequency rates were computed to the following formulas:

Civilian Injury Rate - Number of Civilian Disabling and Fatal Injuries x 1,000,000

Total Hours of Civilian Employment

Military Injury Rate (On Duty) - Number of Military Disabling and Fatal Injuries "On Duty" x 100,000

Total Military Man-Days of Exposure x 1/3

Military Injury Rate (Off Duty) - Number of Military Disabling and Fatal Injuries "Off Duty" x 100,000 Total Military Man-Days Exposure x 2/3

USAF Motor Vehicle Rate - Number of USAF Motor Vehicle Accidents x 100,000

Total USAF Motor Vehicle Mileage

Indicates whether or not the person involved in the accident was on or off duty and whether the accident occurred on or off a military installation, base or site.

STRENGTH (AVERAGE), CIVILIAN

The derived civilian employee strength is developed by dividing the total civilian payroll man-hours worked (including legal holidays) during the report period by the standard number of work hours during the report period:

TOTAL CIVILIAN

Derived Civilian Strength -Man Hours Worked Number of Standard Work Hours

The number of standard work-hours during the report period are the number of calendar days in the month minus Saturdays and Sundays multiplied by 8. Example - there were 21 paid payroll work-days in January 1955, therefore, the standard number of work-hours in the month was 21 multiplied by 8, or 168 hours.

STRENGTH (AVERAGE), MILITARY

The average military strength is obtained by dividing the total military man-days of exposure by the number of days in the report period:

Average Military Strength -Number of Days in the Report Period

The total military exposure is the sum of daily assigned strength figures as shown on all morning reports for the entire report period.

GROUND SAFETY (CONTINUED)

DEFINITIONS

TIME LOSS (CTVILIAN)

Time loss for a civilian employee will be the estimated total number of days he will be unable to report for work as a result of the injury beginning with the first day he is unable to report for work and continuing up to the date of return. Sick leave, annual leave, and holidays will be included in the time loss.

TIME LOSS (MILITARY)

Time loss for a military person will be the estimated number of calendar days he is unable to report for duty as a result of an accidental injury, beginning with the first day he is unable to report for duty and continued up to the date of return.

USAF AIRCRAFT DAMAGED FROM GROUND ACCIDENTS
USAF Aircraft damaged as the result of a ground accident.

(Cost yardstick changes for USAF Ground Accidents are shown on chart under "Definitions". Beginning with July 1953, the table below excludes Act of God accidents, commercial carrier accidents, and other reportable, but not chargeable accident reports. This a modification of Table 29, FY 1955)

Aircraft and Materiel

PART [

AIRCRAFT - MATERIEL

INTRODUCTION AND DEFINITIONS

The data presented in this issue for aircraft inventory are in accordance with active and inactive aircraft classification revised since issuance of the 1955 Statistical Digest. The active inventory category has been expanded to include aircraft previously inactive as follows: Depot Work and Contract Work (Modification), New Production and aircraft excess to command requirements. The active category is now divided into operating active and non-operating active. The non-operating active includes the above previously inactive categories as well as enroute, MMAP aircraft temporarily diverted and ground instruction aircraft. The inactive category now includes principally stored and excess aircraft. Aircraft inventory data are abtained under the provisions of Air Force Regulation 65-110.

In addition, data by type and model of aircraft providing the following information: status of aircraft procurement and production; functional distribution of the aircraft inventory with operating active, non-operating active, and inactive aircraft broken down to provide detail by functional category; gains and losses from first item of model, calendar age distribution. Data on stored aircraft shown in a separate table in SD FY 55 are incorporated into table providing the functional distribution.

As of 1 January 1956, the former "Active" aircraft category was expanded to "Operating Active" and "Non-Operating Active". The "Non-Operating Active" category includes status codes that were formerly inactive. Under the new reporting procedures, the inactive inventory consists, primarily, of stored aircraft and aircraft excess to USAF requirements. In addition, (CX) MDAF Aircraft Temporarily Diverted to USAF was changed from "Active" to "Non-Operating Active", and (PA) Aircraft on Project was eliminated.

The classification of aircraft herein is in accordance with AF Regulation 65-60, dated 15 June 1955. The type classification is generally based upon the type designator or the prefix preceding the basic type designator of each aircraft model. A prefix is assigned an aircraft model when the aircraft is modified to perform a function (indicated by the prefix) other than its basically designated purpose.

The following definitions apply to the terms herein -

AIRCRAFT: A heavier-than air vehicle, capable of flight, which has incorporated in its prime design the ability and/or requirement for human occupancy.

OPERATING ACTIVE AIRCRAFT: Those aircraft which are currently and actively engaged in supporting flying missions, administrative aircraft, test aircraft including those test aircraft on bailment, aircraft provided for the required combat readiness training of rated personnel not presently assigned to tactical units or crew positions.

NON-OPERATING AIRCRAFT: Those aircraft in preparation for possession by units or test activities through any of the logistical processes of supply, maintenance, and modification, and those aircraft which are excess to command requirements.

INACTIVE AIRCRAFT: Those aircraft in the inventory other than operating active and non-operating active aircraft, such as aircraft on loan and bailment (except bailed for test, maintenance and modification); aircraft for which there is no longer a requirement in the active inventory, including those aircraft that have been accumulated in excess of immediate possible future needs; and aircraft in the process of being dropped from the total aircraft inventory.

ACCEPTANCE: Aircraft which have been shop-assembled and fully inspected by constituted USAF or Navy production authorities; and the title, responsibility, and accountability assumed by the contracting agency of recipient.

IN COMMISSION: An aircraft, which without additional repair or maintenance, is safe and capable of normal flight operations. This does not necessarily indicate that the aircraft is capable of performing a specific mission such as combat, photo, etc., but merely that the aircraft is flyable and that the DD form 781 does not bear a red cross. Weather, runway conditions, shortage of operations personnel, or other factors not relating to the aircraft itself will not cause an aircraft to be reported "out of commission".

A O C P: "Aircraft Out of Commission Awaiting Parts" are those aircraft not flyable as indicated by a red cross of DD Form 781, solely due to lack of parts. Aircraft will not be reported as awaiting parts unless the required parts have been requisitioned from the normal supply source at the station where the aircraft is located and notification has been received from the normal supply source that the parts are not available. This category does not include those aircraft awaiting parts required for the performance of modifications defined in AF Regulation 57.1.

AIRTRAME WEIGHT: The weight of the assembled principal structural components of an aircraft. It includes hull or fuselage, wings, stabilizers, vertical fins, control surfaces, landing gear, and nacelles.

GUIDED AIRCRAFT ROCKET: A type of self-propelled aircraft armament normally carried by piloted aircraft which, after launching, can be guided to the target which it destroys by means of an explosive var-head.

USAF GUIDED MISSILES: An unmanned vehicle moving above (about) the earth's surface whose trajectory or flight path is capable of being altered by a mechanism within the vehicle.

USAF AMMINITION: All stocks of serviceable and suspended Air Force ammunition items physically on hand.

TABLE 54-DAF AIRCRAFT INVENTORY NET GAIN AND LOSS SUMMARY-AS OF 30 JUNE 1956 (CONTINUED) (CUMMULATIVE FROM FIRST ARTICLE, EXCLUDES EARMARKED AIRCRAFT)

(This is a new table and does not appear in the previous fiscal year Statistical Digest)

FOOTNOTES:

- A breakdown of losses is shown only for models produced since July 1949 as the information is not
 readily available for the earlier models. Net losses for converted models are included with the losses
 for the original models.
- 2. Includes only those converted models that remain in the inventory as of 30 June 1956.
- Includes 62 aircraft produced as B-36B's. Three aircraft were lost as B-36B's and 59 were converted to B-36D.
- 4. Includes 1 YF-84F that was converted from an F-84E and then subsequently converted to YRF-84F and lost to class 32.
- 5. Includes 471 F-84G's which were diverted to the USAF from MDAP production.
- 6. Includes 4 F-86F's from the F-86E procurement program.
- 7. Twenty-two RB-36E's were produced as B-36A's and 1 as YB-36.
- 8. Three C-97's produced as KC-97A's.
- 9. Includes 20 T-6G's which were accepted for the USAF from the MDAP procurement Program.
- 10. Some T-6C and T-6D aircraft are remfgd as T-6G and LT-6G aircraft. Net losses for the original series are not shown because the exact quantity of each series being remfgd is not available.
- There were 152 RF-80A's manufactured as RF-80A aircraft from July 1946 through March 1947. There are also RF, TF, and QF-80A, B, and C aircraft being modified to and from F-80A,B,C, RF-80A and XRF-80A aircraft.
- 12. Includes 316 F-84F's produced for MDAP temporarily reported in USAF inventory.
- 13. H-13D and H-13E aircraft were originally accepted for the Department of the Army and were subsequently reassigned to the USAF (Air Training Command) to assist in training Army pilots.
- 14. Includes 3 H-34A's produced for Army Temporarily reported in USAF inventory.
- Accepted as F-102A's. However, the Aircraft Production Schedule shows four F-102A's will be changed to YF-102A's in the near future.
- 16. Accepted as RB-52B's. However, the Aircraft Production Schedule shows those RB-52B's will be changed to B-52B's in the near future.
- 17. Includes 2 C-119G's produced for MDAP temporarily reported in USAF inventory.
- 18. Includes 2 H-13G's accepted from Army contracts.

AIRCRAFT ENGINES

INTRODUCTION AND DEFINITIONS

Data on production and inventory of aircraft, missile and drone engines are presented in this section. Engine production data are obtained under the provisions of AFR 67-62, dated 6 August 1954, while engine inventory data are obtained under the provisions of AFR 65-20, dated 8 June 1955.

The following definitions apply to the terms as used in this publication:

ACCEPTANCES: An aircraft engine that has been shop-assembled and fully inspected by authorized USAF or Navy plant representatives, and for which the title, responsibility, and accountability have been assumed by the contracting agency or recipient.

INSTALLED ENGINE: Serviceable or reparable engine assets which are either physically mounted on aircraft, missile or drone; or undergoing organizational maintenance for reinstallation in an aircraft, missile or drone.

SPARE ENGINE: Engines in or intended for the supply system, which are for normal flying support of aircraft, missile or drone.

REPARABLE ENGINE: Engines determined to be operationally unsuitable, requiring other than organizational or field maintenance.

SERVICEABLE ENGINE: Engines determined to be operationally suitable for installation, or are either awaiting or undergoing organizational or field maintenance.

NOTE: A physical world-vide inventory of aircraft engines in July 1955 revealed that the June 1955 inventory was short by approximately 15,000 engines. Subsequently, revisions were made to the AFR 65-20 that would ensure more realistic reporting. It was not until 31 August 1956 that an acceptable inventory was received. In the interest of supplying the most reliable data obtainable, the inventory as of 31 August 1956 is presented in this issue.

UNIT AUTHORIZATION LIST

PREFACE AND DEFINITIONS

The tables included in this section provide summary data which represent the second of a series planned for publication following each annual Unit Authorization List cycle. Air Force Regulations 5-25 and 67-83, and Air Force Manual 171-5 constitute the basic authority for the system.

ORGANIZATIONAL EQUIPMENT. Non-expendable replacement-type equipment, excluding sircraft, prescribed by an authorization document.

MASTER EQUIPMENT ALLOWANCE LIST (MEAL). A publication which prescribes allowances of organizational equipment to be authorized to T/O units through the medium of the Unit Mission Equipment column of the Unit Authorization List.

UNIT MISSION EQUIPMENT (UME). Those items of equipment prescribed by the MEAL, Station Sets, and T/A 1-21 for specific T/O units. This equipment is normally taken with the unit when it changes location.

UNIT SUPPORT EQUIPMENT (USE). That unit equipment other than mission equipment which is required to perform the assigned mission of the unit at a specific base. This equipment will normally be retained by the base upon movement of the unit.

UNIT AUTHORIZATION LIST (UAL). An electric accounting machine list of specific equipment, consisting of Unit Mission Equipment and/or Unit Support Equipment authorized to each individual T/O or non-T/O unit. Air Force Form 601B is used for this purpose.

TABLE OF ALLOWANCE $\{T/A\}$. Headquarters USAF publications which establish equipment allowances. Table of Allowances provide a basis for authorizing unit support equipment in UALs.

TABLE OF ORGANIZATION (T/0). A Headquarters USAF publication which states the mission and capability for which a unit must be manned and equipped; and a guide for manpower planning, programming, and allocation.

BASE ALLOWANCE LIST (BAL). A list of equipment which is the consolidation of all UALs for units or organizations, except special activities, being logistically supported by a particular Air Force base or installation. The BAL in itself is not an authorization document.

EQUIPMENT COMPONENT LIST (ECL). A publication which prescribes the components of individual kits and organizational sets of equipment required for the performance of specific duties, functions, or support of end items of equipment.

STATION SETS. Listing of non-expendable equipment extracted from the MEAL and or applicable ECLs, and expendable equipment extracted from supply catalogs and/or stocks necessary to be included in prepositioned assemblages to insure the capability of a base to meet the minimum requirements of a tactical unit equipmed with unit mission equipment.

NON-STOCK LISTED (NSL). Items which are not listed in Air Force or Army Technical Services catalog publications.

TACTICAL PACKAGE (TCP). A combination of the equipment for the tactical forces, the tactical squadrons, the Armament Electronics Maintenance Squadrons, and the Periodic Maintenance Squadrons as required.

BASE SUPPORT PACKAGE (BSP). A combination of the equipment for the support forces, the Wing Headquarters, the Air Base Group Headquarters, the Air Police Squadrons, the Food Service Squadrons, etc.

MASTER EQUIPMENT NOMENCLATURE FILE (MENF). A punched card file providing stock number, nomenclature, local purchase code when applicable, cost category code, family group code, depot code, reporting code and unit price for items in the UAL system. It is utilized as the official means to identify and to maintain current stock numbers, nomenclatures, and unit prices in existing unit authorization lists. It is the authority for the UAL purposes unless a stock catalog indicates more recent information.

The AFOCT battery is given to newly commissioned officers and to persons being considered for officer training.

These tests are calculated to predict proficiency in AF specialties or success in training, classifying individuals by aptitude clusters.

AIR CREW

A stipulated number of air crew personnel locally organized to operate an aircraft on an assigned mission. (For single-place aircraft, "air crew" equals "air crew personnel.")

AIR CREW PERSONNEL

- (2) The Medal of Honor, established by law, is awarded to any person who, while an officer or airman in the Air Force, in conflict with an enemy of the United States, distinguishes himself conspicuously by gallantry and intrepidity at the risk of his life above and beyond the call of duty. Recommendations for this highest United States decoration must incontestably prove that the bravery of self-sacrifice involved conspicious risk of life, the omission of which could not justly cause censure (act of 9 July 1918, 40 Stat 870; 10 USC 1403; ML 1949, sec. 903).
- (3) The Medal of Honor is awarded in the name of Congress and is usually presented by the President of the United States. It should not be confused with specially enacted Congressional medals.

c. Distinguished Service Medal:

- (1) The Distinguished Service Medal, established by law, is awarded to any person serving in any capacity with the Air Force who distinguishes himself by exceptionally meritorious service to the Government in a duty of great responsibility. Responsibility means the exercise of authority or judgment in duties which decide the successful outcome of any major military operation. In peacetime, awards are limited to recognizing services of national or international significance(act of 9 July 1918, 40 Stat 870; 10 USC 1407; 1408; ML 1949, sec. 906).

 - (3) The Legion of Merit is awarded without degree to members of the Armed Forces of the United States.

The saving of a life or the success of the voluntary heroic act is not essential for consideration for an award(act of 2 July 1926, 44 Stat 789; 10 USC 1428; ML 1949, sec. 913).
- (3) Authority to award the Soldier's Medal may be delegated during wartime down to include commanders of numbered air forces.

TABLE 125 - SUMMARY - MILITARY STRENGTH BY TYPE - | AUG 1907 THROUGH FY 1956

NOTE: Annual strength figures are as of 30 June except as noted. The history of the AAF falls into several well defined phases. On 1 August 1907, the Aeronautical Division of the Signal Corps was established, and this division continued until 1 July 1914 when it was reorganized as the Aviation Section of the Signal Corps by Presidential order and comprised the Division of Military Aeronautics, Bureau of Aircraft Production, and the Spruce Section which had been organized in November 1917. (The latter was created to expedite lumber production for aircraft construction.) Legislative cognizance of a separate arm occurred on 4 June 1920 when the Air Service was created. The Air Corps was established in July 1926 and continued until the reorganization of the Army in March 1942. At that time, the Army Air Forces came into being and continued under this organization until the three defense agencies were established in 1947 on 17 September 1947, James V. Forrestal took the oath of office as Secretary of Defense. The Air Force was officially separated from the Army the following day and the new agency, U.S. Air Force, was established, but it was not until 1948 that Air Force reporting was entirely divorced from the Army. Blank columns in the table below indicate that breaks were not available for the period; and other necessary explanations are covered with foot notes. Army personnel on duty with the US Air Force known as SCARWAF, were included in this table from September 1947 through June 1955.

SAMPLING VARIABILITY

THE RELIABILITY OF AN ESTIMATED PERCENTAGE DEPENDS UPON BOTH THE SIZE OF THE PERCENT-AGE AND THE SIZE OF THE TOTAL ON WHICH IT IS BASED. THE FOLLOWING TABLES PRESENT THE APPROXIMATE SAMPLING VARIABILITY OF ESTIMATED PERCENTAGES, BASED ON POPULATION TOTALS OF SELECTED SIZES.

IF THE ESTIMATED PERCENTAGE IS 2 OR 98, 5 OR 95, ETC., (AS INDICATED ON THE LEFT INDEX OF THE TABLE), AND THE TOTAL (BASE FIGURE) IS 750, 1000, ETC., (AS INDICATED ON THE RIGHT INDEX. OF THE TABLE) THEN THE CHANCES ARE APPROXIMATELY 19 OUT OF 20 THAT THE DIFFERENCE (IN PERCENTAGE POINTS), DUE TO THE SAMPLING VARIABILITY, BETWEEN THE ESTIMATED PERCENTAGE AND THE PERCENTAGE WHICH WOULD BE AVAILABLE IF ALL INDIVIDUALS HAD BEEN INTERVIEWED, IS LESS THAN:

EXAMPLE

To illustrate; of the 53,511 Moster Sergeants, 18.4 per cent are not high school graduates. The sampling variability is about 1.5 per cent. The chances are approximately 19 out of 20 that the percentage which would be obtained by a complete survey would be between 16.9 and 19.9 per cent.

(This table shows the training received by civilian employees of the Air Force in the Continental United States. During the period from 1 July 1955 through 31 December 1955. Man-hours of on-the-job and off-the-job training are shown for each area of training. The total course completions for civilian employees in the Continental United States are shown for the same period. A course completion refers to one course satisfactorily completed by an employee. Only those employees who satisfactorily completed the courses in which they were enrolled are included. Information for last half of FY 1956 not available as agency was revising reporting system. Data may be available for next publication.)

Medical Activities Casualties and Patient Transport

PART XVI

MEDICAL ACTIVITY, CASUALTIES, AND PATIENT TRANSPORT

DEFINITIONS

ACTIVE DUTY MILITARY PERSONNEL

Consists of all military personnel who are on extended active duty. Excluded are military personnel who are on short tours of duty.

ADMISSION FROM DUTY

The enrollment in a patient status of a military person whose treatment requires that he be excused from duty beyond midnight of the day on which he reported for treatment, whether treated in a hospital, a dispensary or quarters. A patient is considered as admitted from duty only once during a continous period of treatment: if he is transferred from one medical facility to another, the transfer is not an admission from duty. The term includes patients admitted to non-military medical facilities when the reporting facility has assumed responsibility for the records of the patient. Admissions from AWOL, except those AWOL from a patient status, are counted as admissions from duty. The term excludes persons treated on an outpatient status, and cases carded for record only.

ALMISSIONS RATE

A measure which indicates the frequency of patients being relieved from duty because of medical reasons. Hence, the admission rate is based on admissions from duty. The conversion of number of admissions to show the number of admissions that would occur during a year if admissions occurred throughout an entire year at the same frequency as in the period of observation, per thousand average strength is termed the annual admission rate and is computed as follows:

Number of admissions during period X number of such periods in a year X 1000 Average daily strength during the period

ALMISSIONS TO HOSPITALS AND CLASS "A" DISPENSARIES

Include all patients admitted to the wards of an Air Force hospital or Class "A" Dispensary whether from duty or by transfer from another medical facility. Excluded are cases treated in quarters, or in a duty status, or in a nonmilitary medical facility.

AVERAGE OCCUPIED BEDS

The average daily number of patients occupying beds in hospitals and Class "A" Dispensaries as of midnight of a given day.

AVERAGE STRENGTH SERVED

Includes not only those U. S. active duty military personnel for whom a base holds sick call, but also those U. S. active duty military personnel reporting elsewhere (Dispensaries) for sick call but attached to the base for in-patient care.

CASUALITY

Any person who is dead (from any cause) or whose services are lost to his unit for 24 hours or more because of involuntary absence (missing), capture, internment, or wounds, or injuries requiring admission to a medical treatment facility. Any person undergoing treatment for wounds or injuries as of 2400 local time, is considered as having been lost to his unit for 24 hours or longer. Mental disorders, psychoneurotic cases, colds and other diseases (not causing death) are not included as casualties. Casualties are divided into "battle" and "nonbattle" categories.

CAUSATTVE AGENT

That instrumentality, factor, or occurrence resulting in death, wound, injury, or missing status.

COMPLETE PHYSICAL EXAMINATIONS

Include only routine physical examinations performed in accordance with USAF directives and recorded on the report of medical examinations (Standard Form 88); physical inspections of food handlers or barbers are not included nor are examinations for personnel reporting sick.

DEATHS

Includes those persons killed outright (or dying before reaching a medical treatment facility); those wounded or injured persons who subsequently died of their wounds or injuries (after being admitted to a medical treatment

MEDICAL ACTIVITY, CASUALTIES, AND PATIENT TRANSPORT (CONTINUED)

DEFINITIONS (CONTINUED)

facility); those persons reported as missing who were either subsequently conclusively determined to have been killed, or who, having been in a missing status for a year or more, were presumed to be no longer living; whether or not these incidents occurred "in action" or under "battle" or "pophattle" conditions.

FULL TIME EQUIVALENT PERSONNEL

Are total assigned and attached personnel converted into actual full-time strength; for example, 10 individuals employed on a full-time basis and 4 individuals employed on a half-time basis, are considered to be 12 full-time equivalents.

HOSPITALIZATION RATIO

The proportion of strength occupying hospital and Class "A" Dispensary beds on an average day (of the period for which it is computed). It differs from the noneffective ratio in that quarters or Class "B" Dispensary patients are excluded. The ratio is computed per 100 strength as follows:

Number of sick days in hospital and dispensary in the period X 100
Average daily strength X number of days in the period

or:

Daily average number of patients occupying hospital and dispensary beds Average daily strength for the period

INCIDENCE

A count of diagnostic entites reported, as distinguished from number of patients admitted.

MISSING

Any person is missing who is involuntarily absent or who fails to return from a scheduled flight or mission, who is not known to be dead, AWOL, in a hospital, in confinement, on leave, or in any other absent category.

NONBATTLE CASUALTY

Any dead (including those as a result of disease), or wounded, injured or missing person, not classed as "Battle" casualty are defined herein. All self-inflicted wounds or injuries and injuries due to elements such as frostbite and trenchfoot are considered to be "nonbattle". If there is any doubt as to whether a casualty, occurring under combat mission conditions, was due to "nonbattle" factors, the casualty is classed as "battle" and not as "nonbattle." NONEFFECTIVENESS

The temporary loss of manpower from duty, in this context for medical reasons.

NONEFFECTIVE PATIO

The proportion of strength not available for duty on an average day (of the period for which it is computed) because of medical reasons whether under treatment in hospital, dispensary, or quarters. The ratio is computed per 100 strength as follows:

Number of sick days in period X 100

Average daily strength X number of days in period

or:

Average daily number of "patients remaining" X100 Average daily strength

OPERATING BEDS

Those medical treatment facility beds which are currently set up and in all respects ready for the care of patients, and which the facility is staffed and equipped to operate. Bassinets and Class "B" Dispensary beds are not included.

OUTPATIENT TREATMENTS

An outpatient who presents himself for medical advise or treatment at a medical facility, is counted as one outpatient treatment each time he reports at any one of the clinic or departments; consequently, more than one treatment may be reported for each visit.

OUTPATIENT VISITS

A visit is counted for each patient (not excused from duty) who on a given day presents himself for either med-

DEFINITIONS (CONTINUED)

ical advice or treatment. On any given day, only one visit is counted regardless of the number of times the patient is seen; when the patient is seen on multiple days, one visit is counted for each day. Patients reporting for prescribed examinations and immunizations are not counted as a visit.

PRINCIPAL DIAGNOSIS

A term used to indicate the sum of sole and primary diagnosis.

SPECIFIED PERIODIC EXAMINATIONS OR TESTS

Are those examinations or tests administered to personnel, military or civilian, exposed to industrial-type bazards.

RETURNS TO MILITARY CONTROL

Persons, previously reported as missing, who have returned to military control from a missing status.

(This table reflects the pounds of food of animal origin inspected as issued or otherwise disposed of and the per cent rejected from 1 July 1955 through 30 June 1956. Although all Air Force owned subsistence items are reinspected many times as received, stored, shipped, and issued, each pound is included but once in this table. Subsistence is disposed of in one of two ways; i.e., by rejection and salvage incident to surveillance inspection or by issue or sale.)

TABLE 249 - USAF VETERINARY NON-ANIMAL ORIGIN FOOD INSPECTION SERVICE INCIDENT TO SURVEILLANCE - FY 1956

(This table reflects the pounds of food of non-animal origin inspected as issued or otherwise disposed of and the per cent rejected from 1 July 1955 through 30 June 1956. Although all Air Force owned subsistence items are reinspected many times as received, Stored, Shipped, and Issued, each pound is included but once in this table. Subistence is disposed of in one of two ways; i.e., by rejection and salvage incident to surveillance inspection or by issue or sale.)

SECURITY AND DISCIPLINE (CONTINUED)

PROVOST MARSHAL

Provost Marshal Statistics are a collection of selected data concerning corrections, security violations, and delinquencies charged to Worldwide Military Personnel on active duty. The statistics reported in this section are derived from AF Form 511, "Provost Marshal Activities Report."

The following definitions affect this portion of the Morale Reports:

DEFINITIONS

ABSENT WITHOUT LEAVE (AWOL)

The status or the offense of any member of the Air Force, who, without proper authority:

- (1) Fails to go to his appointed place of duty at the time prescribed, or
 (2) Goes from that place, or
 (3) Absents himself or remains absent from his unit, organization, or other place of duty which he is required to be at the time prescribed (Uniform Code of Military Justice, Article 86) (See AFR 35-73 1-4 dated: 2 August 1955.)

APPREHENSION

a. Cooperation of State and Local Police Forces. Commanders of zone of interior major air commands will take steps to secure the active cooperation of all State and local police forces and such other officials and organizations as they may consider useful to insure the person's prompt return to military control. Such agencies will be informed that they should not take action to apprehend an absentee or deserter unless they are in receipt of either DD Form 553 or information from an officer of the Air Force that the person is an absentee or deserter whose return to military control is desired. Commanders of major air commands overseas will take such action as the local situation may warrant.

FEAF - Far East Air Forces

- Personnel Authorized to Apprehend:

 1) Military. Members of the Armed Forces are authorized to apprehend absentees and deserter in the circum-(1)
- stances described in MCM, 1951, paragraphs 17, 18, and 19.

 (2) Civilians. Any civil officer having authority to apprehend offenders under the laws of the United States or any State, district, Territory, or Possession of the United States may summarily apprehend a deserter from the Armed Forces of the United States and deliver him into the custody of the Armed Forces of the United States (Uniform Code of Military Justice, Article 8). Generally, a private citizen does not have any authority to apprehend a deserter unless authorized to do so by a military officer (distribution of DD Form 553 has been held to be sufficient authorization).

CUSTODY GRADE

Prisoners will be classified as being in a minimum, medium or maximum custody grade in accordance with the criteria outlined in (1), (2), and (3) below. The initial classification will be determined by the confinement officer based upon the nature of the offense, demeanor of the prisoner upon admission, and any other pertinent information available.

- (1) Minimum custody prisoners-- Those who are sufficiently stable, dependable, and trustworthy who require little or no custodial supervision.

 (2) Medium custody prisoners require continual supervision, but their escape would not threaten life, limbor
- property.

 (3) Maximum custody prisoner -- Those whose escape would present a distinct threat to the safety of life, limb or property, and who require special custodial controls and handling.

AF RESERVE (CONTINUED)

AIR' FORCE RESERVE OFFICERS TRAINING CORPS (AF ROTC)

AFROTC STRENGTH

This is the inventory of all Air Force Reserve Officers' Training Corps (AFROTC) students in active participation of ROTC training, in conjunction with academic curriculum at civilian educational institutions.

CONDITIONAL ENROLLMENT

This type of enrollment is a tentative enrollment which will not become absolute unless and until the proper authority determines that the student concerned is fully qualified for formal enrollment in the advanced course of the Air Force ROTC.

ENROLLED STUDENTS

This group includes both conditionally and formally enrolled students.

FORMAL ENROLLMENT

This type of enrollment is an absolute advanced enrollment where a condition does not exist that would question a student's qualification for enrollment. Such enrollment entitles the student concerned to receive all benefits, financial and otherwise, provided by law and regulations. (Tables in this publication are based on this type of enrollment).

EXPLORERS

Air Force cooperation with Explorer program has been provided since the program was initiated in 1941, when General Arnold offered the Director of Senior Scouting, Boy Scouts of America, the support and cooperation of the USAF. The mission of this program is to assist in the general development of youth in the fundamental principles of citizenship, patriotism, and leadership while incidentally providing an opportunity for the explorers to learn aviation essentials and to obtain a better understanding of their age and its significance. Flight activities are of a routine training nature, not involving special hazards and without additional expense to the government. The activities of the USAF include some flight transportation and aircraft orientation as well as entertainment of all explorers (Air, Sea, and Navy and Rover Army) at the air bases or encampments as planned in cooperation with the Army and the. Navy. The Explorer program is conducted in conjunction with other activities of the Boy Scouts of America.

EXPLORER MEMBERSHIP includes boys of 14 years of age and over; Cub Scouts, include boys 8 through 10 years, and Boy Scouts, boys 11 through 13 years.

Exploring provides activities in four areas: Indoor, Outdoor, Services and Social. It gives the young man the opportunity to plan the use of his leisure time wisely and to develop himself in the sense of security and self reliance which make for a happy, well-adjusted, law abiding citizen.

INDOOR ACTIVITIES range from industrial tours and discussion groups to hobby colleges. Vocational conferences and exploration help the young man to face the future rather than to fear it.

OUTDOOR ACTIVITIES are of the vigorous physical cross country types that take the Explorer into diversified areas such as caves, mountain areas, sea cruises, etc.

EXPLORER (CONTINUED)

SERVICE ACTIVITIES Include projects which help the Explorer's home, the Explorer's church or synagogue, and the plorer's community.

SOCIAL ACTIVITIES afford the Explorer an opportunity to meet people, to get along with them, to express his opinion in front of groups, to defend his thoughts in debates and round table discussions. He learns to listen and evaluate; he learns good manners.

All tables reported in FY 1956 publication of the "USAF Statistical Digest" are based on the Forty Second, Forty Third, Forty Fourth, and Forty Fifth Annual Reports of the Boy Scouts of America to Congress.

TABLE 300- BUMMARY - CIVIL AIR PATROL (CAP) - HIGH SCHOOL AVIATION EDUCATION PROGRAM - 1949 (FALL) THROUGH 1956 (SPRING)

The Coordinated CAP-High School Aviation Education Program is an aviation education plan which may be described as general education in regard to aviation.

The course, as a one-year program for high school instruction, is taught by regular members of the school faculty. (It is also designed as a two-year course for use at CAP squadron level with CAP and Air Force Reserve personnel serving as instructors.) Any student is eligible to participate in the high school course of instruction, and CAP membership, though desirable, is not necessary.
